

## Mounting Instructions:

1. Mount the adaptor plate to the trailer winch stand using three flat head screws provided, with lock washers and nuts. Use any of the five holes provided except the center hole.
2. Install the winch on the plate and secure with the hex head bolt and wing nut provided.
3. If plate cannot be mounted with more than two bolts, then extra care must be taken to never exceed 3000 lbs. line pull. Overload could cause two bolts to be broken.
4. Figures 1 and 2 show typical mounting methods.
